

Free Flight Program Office Information (FFPO)

Initial contact was made with Terrence Moore at the FAA Technical Center on or about August 19, 2001.

Terrence later advised that all coordination would need to go through the FFPO. Contact was established with Jodi Green who was the acting manager of the office. Copies of the introduction letter and problem statement were faxed to her.

Several calls were made to the FFPO, the last being on October 4, 2001. During this call with Craig Marino (202-220-3408), Craig advised that their primary tools and functions were concentrated in the CDM process, and suggested we check with the ATCSCC for more information.

No further contact has been made.
