

Northeast Corridor Atlantic Coast Routes (NEC ACR)

Implementation Briefing

Federal Aviation
Administration

Meeting Purpose and Agenda

- **Purpose**
 - To Provide Details on the Implementation of NEC ACR
- **Agenda**
 - What We Are Doing, and... Why, How, and When
 - Airspace Improvements for Washington Center (ZDC)
 - How We Will Ensure Success
 - Short-Term Traffic Management Initiatives (TMIs)
 - Preferred IFR Routes (Route Stitching)
 - How You Can Help
 - Detailed Description of Route/Procedure Changes
 - Q/Y-Routes, J-Routes, SIDs, STARs

What We Are Doing

NEC ACR is one of the biggest changes to the National Airspace System (NAS) in decades

- **39 new/amended Q Routes and Y Routes will replace the north-south high-altitude route structure along the east coast of the United States**
- **83 legacy J Routes and Q Routes will be deleted/amended**
- **57 new/amended/deleted SIDs/STARs/IAPs**
- **Changes will affect routes in seven FAA ARTCCs**
 - ZBW, ZNY, ZDC, ZTL, ZJX, ZMA, ZOB
 - From Florida to Maine, and as far west as Ohio, Tennessee, Alabama

Why We Are Doing This

- **Transition to a PBN-Centric NAS**
 - Replace conventional J Routes with optimized RNAV-2 Q and Y's
 - Optimized routes require less airspace, thus enabling additional routes to be implemented in existing airspace volumes
- **Improve sector throughput for high altitude traffic to and from NEC airports**
- **Improve ability to accommodate requested altitudes**
- **Reduce the need for radar vectors and reroutes**
- **Reduce airspace complexity**
- **Decrease reliance on ground-based navigational aids (NAVAIDs)**
 - Supports the FAA VOR Minimum Operational Network (VOR MON)

Federal Aviation
Administration

39 New/Amended Q/Y Routes

- **34 Q-Routes**

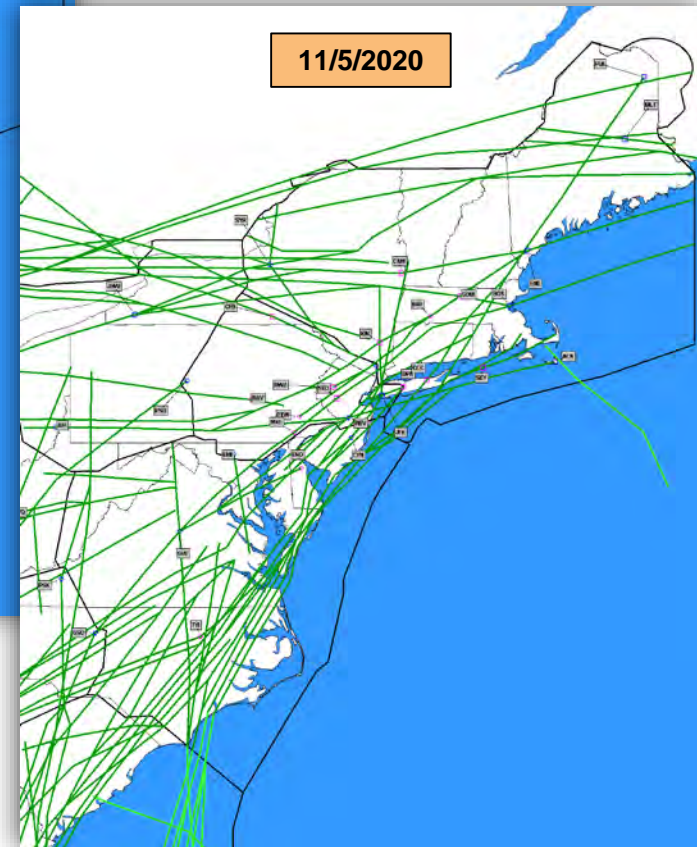

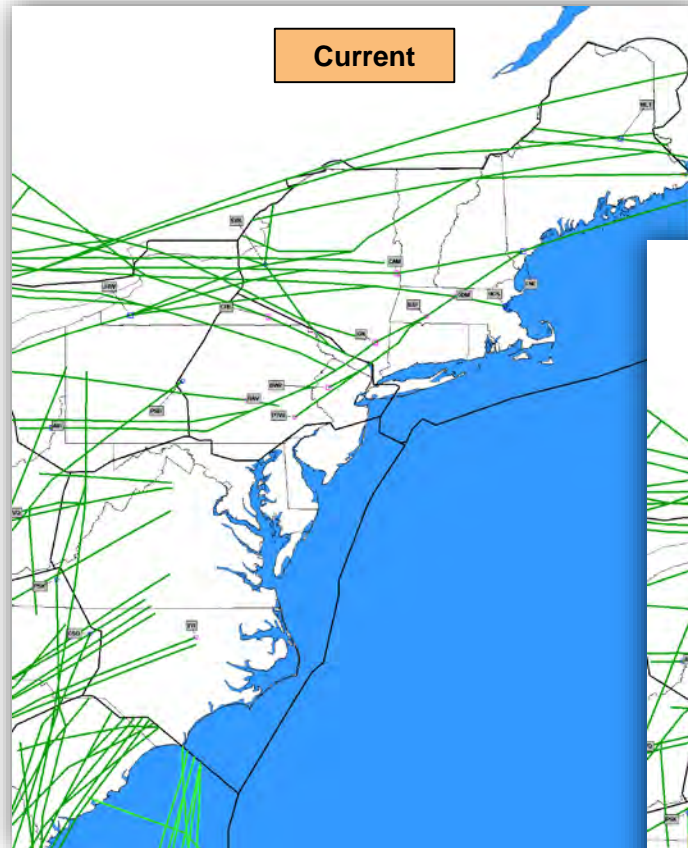

- 19 New
- 15 Amend

- **5 Y-Routes**

Administration

How We Will Implement This

- **Near Term Implementation**

- When and where possible, implement routes/procedures or delete legacy routes/procedures to reduce the size and complexity of the main implementation

- **Main Implementation**

- Utilize a “phased implementation” by publishing new procedures on one chart date, then implementing on the next chart date in 56 days
- Provide operators time to program new routes
 - New Q/Y Routes to be NOTAM'd “Not Authorized” NA or “ATC Assigned Only” for a full chart cycle
 - Legacy J-Routes to be deleted concurrently with implementation of the new routes

Federal Aviation
Administration

Phased Implementation

- **NEC ACR will be implemented on 9 separate chart dates over a 13-month timeframe 10/10/2019-11/5/2020**
 - 179 separate changes (publish, amend, or delete)
 - 117 changes require Notice of Proposed Rule Making
 - 2 airspace implementations (1 low altitude, 1 high altitude*)

***NOTE: Includes 3 minor airspace sector boundary changes**

Implementation Milestones

10/10/2019 Publish/Implement 1 New Y-Route and 8 Waypoints

11/7/2019 Implement ZDC Low Altitude Sector Changes

12/5/2019 NOTAM NA 33 J-Routes/Q-Routes (FL Metroplex) for 56 days

1/30/2020 Delete/Amend 33 J-Routes/Q-Route (FL Metroplex), Cancel N/A NOTAM

1/30/2020 Delete 5 CHS STARs

3/26/2020 Delete/Amend 7 SIDs (BWI/IAD/DCA/HEF/ADW/DOV)

5/21/2020 Amend 2 Q-Routes: Q75, Q475

5/21/2020 Publish/Delete/Amend 24 SIDs/STARs (LGA/EWR/WRI/RDU)

7/16/2020 Delete/Amend 18 J-Routes

7/16/2020 Amend 9 SIDs/STARs/SIAPs (CHS/JZI)

9/10/2020 Publish/Amend 32 Q-Routes, 4 Y-Routes, NOTAM N/A for 56 days

9/10/2020 Amend 1 ATL SID

10/8/2020 Implement ZDC Ultra High Sector 30 and 3 minor airspace changes

11/5/2020 Implement 32 Q-Routes, 4 Y-Routes, Cancel N/A NOTAM

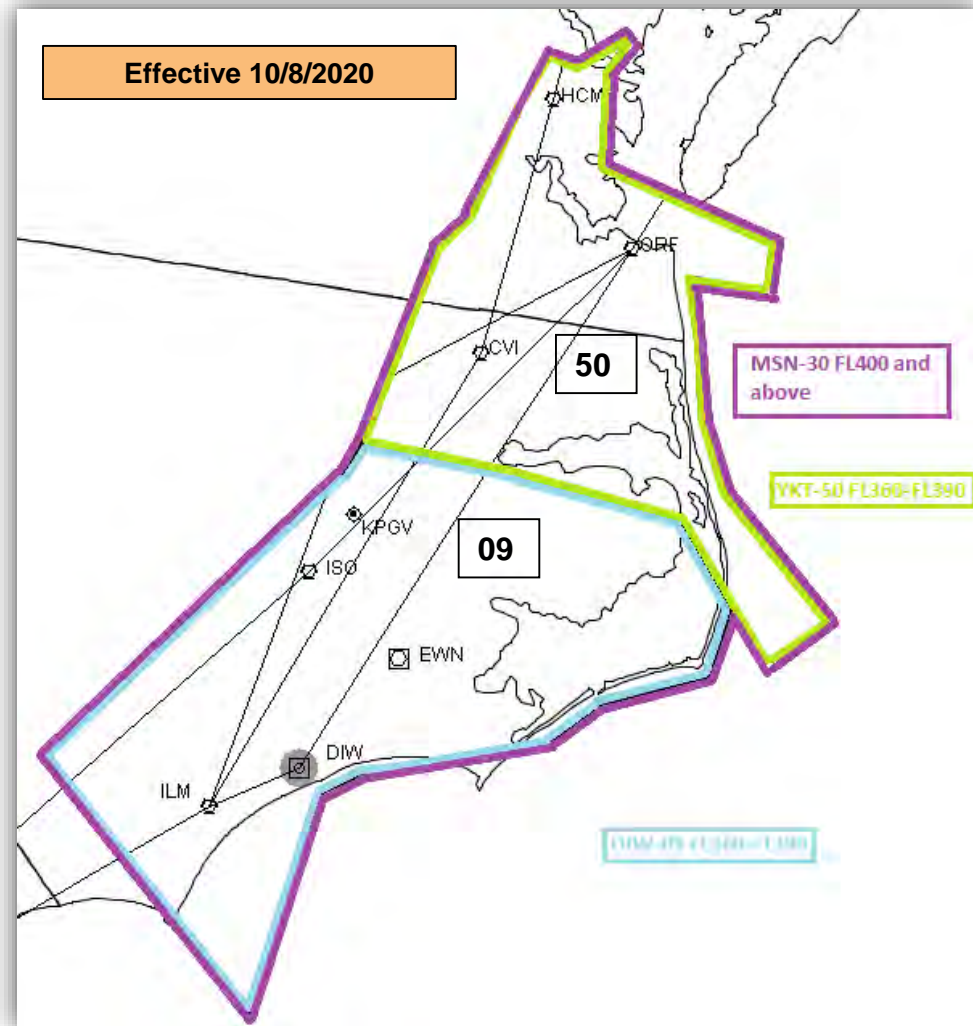

11/5/2020 Delete/Amend 31 J-Routes, 1 Q-Route

11/5/2020 Publish/Delete/Amend 11 STARs (PHL/EWR/TEB/LGA/DOV/WRI)

ZDC High Altitude Sector Changes

- **Stratify Sectors 09 & 50 to create new Sector 30**
- **Resulting 3 Sectors**
 - 09 DIW Ultra High
 - FL360-390
 - 50 YKT Ultra High
 - FL360-390
 - 30 MSN Super High
 - FL400-ABV
- **To help reduce sector workload/complexity and improve sector throughput**

How We Will Ensure Success

- **Ensure best use of new routes by completing extensive route stitching**
- **Ensure Industry/Military knows what routes to file for each implementation phase**
 - Outreach to NCF, CNS Task Force, route planners, dispatchers, GA, Jeppesen, NBAA, User Groups, Military
 - Make preferred routes available early and through automated means
- **Increase time for industry to complete flight planning/programming and check charts/databases for errors**
 - NOTAM new procedures NA to suppress new routes from 9/10/2020-11/5/2020
- **Delete Jet Routes on day of implementation (11/5/2020)**

Federal Aviation
Administration

How We Will Ensure Success

- **Ensure usage of correct routes during implementation**
 - Coordinate with other facilities (i.e. ZOB, ZKC, ZME, ZHU, ZID) to request that flights be left on routes (no shortcuts during phase-in)
- **Manage sector complexity during main implementation phase-in**
 - Coordinate short-term implementation Traffic Management Initiatives (TMIs) with the FAA Command Center and Industry
 - Manage special events affecting the implementation
- **Resolve implementation issues rapidly**
 - Utilize Go-Teams starting on implementation day to monitor the operation and intervene as the situation dictates
 - Utilize an Open Conference Bridge to communicate issues real-time and assist in timely resolution

Implementation TMIs

- Utilized up to 2 weeks during the implementation period
- To provide controllers and aircrews the opportunity to become accustomed to the new routes and changes to the airspace while ensuring a safe operation
- Intended to reduce complexity and redistribute volume across all available airspace
- TMIs being considered to reduce the need for AFPs
 - Reroutes to the west of ZDC i.e.J6, altitude capping or tunneling
- Voluntary actions to reduce need for TMIs
 - Use of overwater routes, filing at/above FL400, filing lower altitudes on shorter routes, filing routes west or north of ZDC
- TMIs to be re-evaluated on a daily basis

Preferred IFR Routes

- **Published Preferred IFR Routes to be updated each chart date**
 - Should be used to the maximum extent possible
 - NEC ACR will share anticipated changes as soon as practical
- **Route stitching document(s) including non-published routes provided by NEC ACR should be utilized only when Published Preferred IFR Routes not available**
- **Coded Departure Routes (CDRs) and Playbook Routes to be updated each chart date, but should not be utilized without specific coordination**

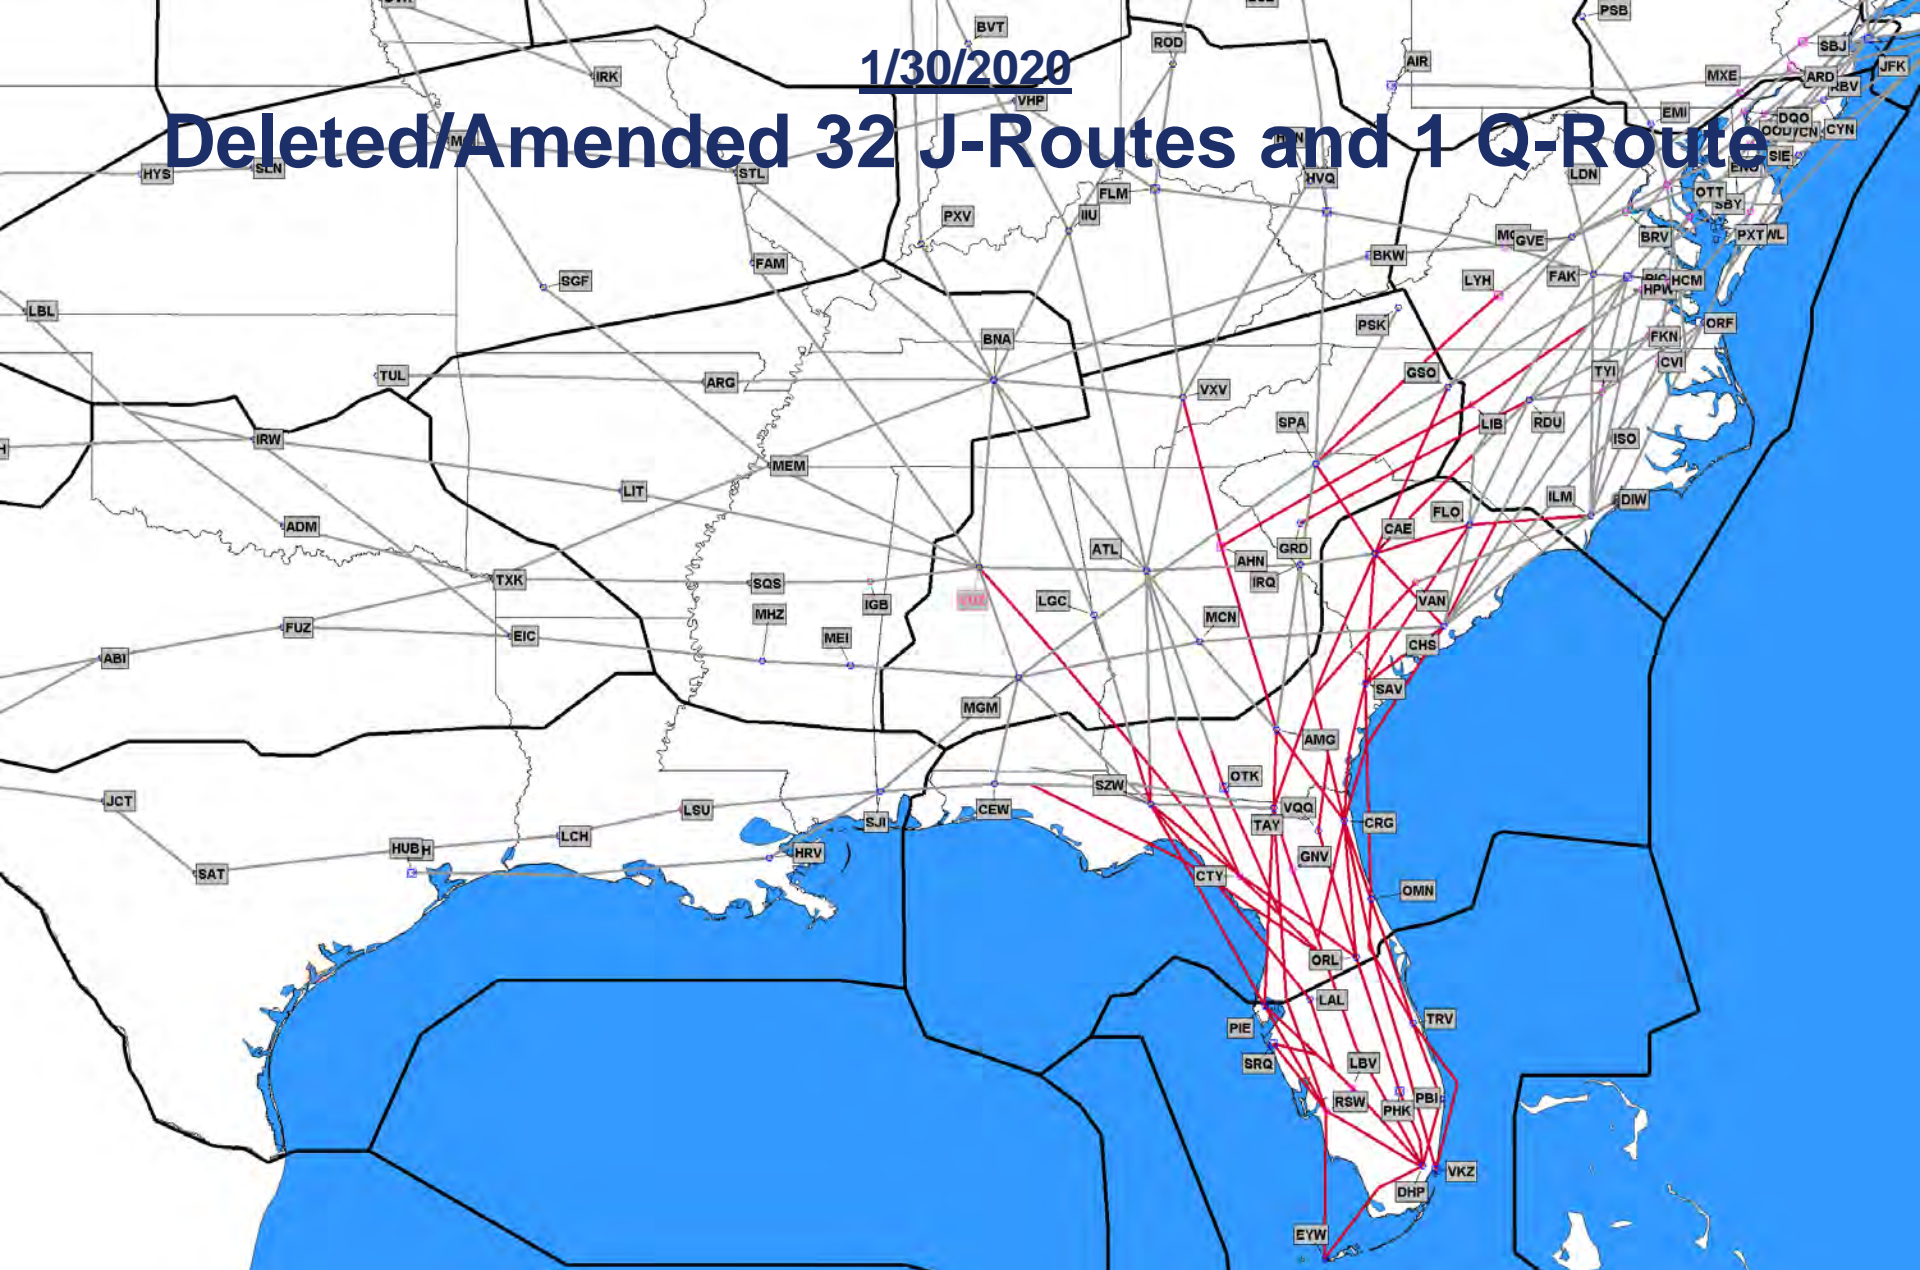

How You Can Help

- **Share this briefing with others**
 - Share inside your organization
 - Utilize briefing(s) for route planners & dispatchers
- **Provide feedback and suggestions**
 - Help identify issues/mitigations not yet identified
 - Direct questions/comments to NEC ACR
- **Watch for additional information**
 - Flight Planners Telcon, NCF briefings, NBAA, CNS Taskforce, etc.
- **Plan resources for route planning & programming**
 - Especially after the 9/10/2020 publication of new routes
- **Be ready to utilize the new routes**
 - Beginning on 11/5/2020 flight plan the new routes

- 
- A map of the Eastern United States, including parts of Canada and the Atlantic Ocean. The map is overlaid with a dense network of black lines representing flight routes. Several routes are highlighted in green, particularly those radiating from the New York City area (LGA, LAX, JFK) and extending towards the Northeast and Midwest. Various airport codes are labeled throughout the region, such as BOS, BNE, BTV, CLE, DCA, EWR, FTX, GSO, HSY, IAD, IND, JAX, LAX, MCO, MIA, ORD, RDU, SFO, and TOL. The map shows a complex web of connections between major and regional airports.
